Project Date

1980

JBA provided engineering services to the San Bernardino Valley Municipal Water District (SBVMWD) for the design of the 3-mile, 48" Baseline Feeder water transmission main line running from the City of San Bernardino to the City of Rialto in Southern California.

The design of the pipeline required boring under a railroad and connections to two 4,500 GPM wells and an existing storage reservoir.

Key Project Staff

Joseph S.C. Bonadiman, P.E. – *Principle Engineer*
