Completion Date

2008

JBA worked closely with Miller Architects to provide topographic services, boundary surveying and planning services on the 17-acre shopping center in Apple Valley. We prepared preliminary drainage and grading plans to obtain the entitlements of the project, which included a Cinema Star Theatre.

During engineering design we prepared substantial offsite improvement plans including water, a sewer lift station and street improvements on Bear Valley Road. We also provided construction staking with an aggressive schedule to open the theatre on time and within budget.

Key Project Staff

Edward J. Bonadiman, P.L.S. – *Project Manager*
J.T. Stanton, P.E. – *Design Engineer*
